

## Beyond compliance: CSR Performance

### WHY ENABLON SD-CSR?

- ♦ **The most complete solution**  
available on the market, Enablon is used by more than 1,000 global companies and 1,000,000 users worldwide.
- ♦ **Comprehensive and integrated system:** includes sustainability reporting, regulatory compliance monitoring, performance management, and stakeholder relationship management.
- ♦ **Facilitates reporting**  
reduces costs and improves data reliability.
- ♦ **Easy-to-use and administer**  
resulting in low training and administration costs.
- ♦ **Secure web-based architecture**  
available anywhere, anytime.
- ♦ **Based on flexible technology**  
which adapts easily to your organization's specific processes, frameworks, and stakeholder expectations.

### Reliable and accurate information: an essential requirement for transparency

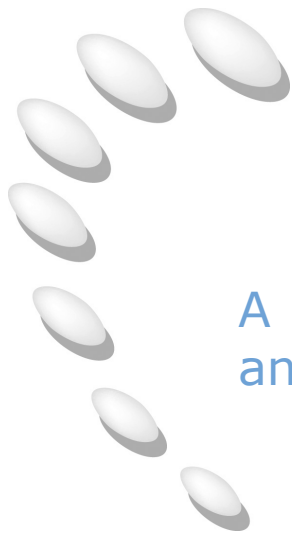

Companies are facing increased demands for information about their social and environmental performance. Stakeholders, including investors, customers, rating agencies, the media, and the general public, are all evaluating companies using nonfinancial criteria. CSR performance data is thus becoming an increasingly important feature of corporate reports. The trend towards external auditing of CSR and sustainability reports is also reinforcing the need for greater data reliability and overall high standards of transparency and auditability.

### CSR management: a key instrument for improving corporate performance

Companies that set up a reliable and auditable CSR reporting and management system can manage risks more effectively and improve their operational efficiency. The first step is to translate values and policies into operational objectives and measurable indicators. These objectives and indicators can then be built into management dashboards, allowing managers to begin to embed CSR into core operations, share best practices, and track progress towards real results.

### A comprehensive business-oriented solution designed to optimize CSR performance

With Enablon SD-CSR, a company's entire CSR/sustainability reporting cycle can be managed more effectively and with greater reliability. Enablon SD-CSR is designed using input from more than 1,000 global companies. The resulting modules contain features specifically tailored for managing and reporting CSR performance.

Corporate Responsibility

# Enablon SD-CSR

## A flexible and modular solution for CSR reporting and management

*“We believe that our sustainability strategy and software tool has powerfully improved collaboration, innovation, and overall performance. It is helping in the drive to reduce total cost of operations, to track developing consumer interest in sustainable products and overall allowed us to better meet our stakeholder expectations.”*

**Paul Rowsome,**  
Environmental Manager,  
CARREFOUR

### Facilitates data collection

Qualitative and quantitative information is collected through questionnaires tailored to each user's role and function. Companies can rapidly define and deploy new reporting requirements to meet stakeholder's expectations.

### Increases data reliability

Easy-to-administer tests ensure data reliability while a workflow engine accelerates the entire validation process. All modifications can be tracked for future auditing.

### Improves CSR management

Companies can track CSR performance at all levels using customizable dashboards that chart actual performance against corporate and facility-level targets. Dashboards are coupled with action plan modules to take performance to the next level.

### Shares best practices

An integrated document repository and discussion forums allow users to easily upload, store and share policies, guidelines and best practices.

### Evaluates regulatory compliance

Built-in tools allow companies to assess their compliance with local and international regulations

### Addresses reporting standards

Structured around key sustainability and CSR frameworks, Enablon SD-CSR makes it easy to address assessment criteria used by SRI rating agencies and standards such as the GRI G3 Guidelines. The reporting module allows companies to create customized reports to meet stakeholder information needs.

#### **ENABLON, THE WORLD'S LEADING PROVIDER OF SUSTAINABILITY AND QEHS SOFTWARE SOLUTIONS**

Enablon is the world's leading provider of Sustainability Management solutions. More than 1,000 global companies and 1,000,000 users worldwide use Enablon software solutions to manage environmental and social performance, minimize risks and improve profitability.
