

Quality, Environment, Health & Safety Management

ENABLON QEHS SOFTWARE SUITE

AN ENABLON PRODUCT FAMILY

Improving Quality, Environment, Health & Safety Performance Management

In today's business environment, climate change, resource scarcity and energy efficiency are increasingly critical to a company's short and long term success. Stakeholder expectations for transparency and accountability continue to rise, while regulatory and reporting requirements are becoming more stringent around the world.

At the same time, corporate executives lack real-time reporting, monitoring, and information from widely dispersed facilities and therefore struggle to coordinate company-wide QEHS management and improve QEHS performance.

By contrast, an integrated system to collect and consolidate data, automate reporting, and allow enterprise-wide information-sharing enables companies to:

- ✓ Identify best practices and share them throughout the organization
- ✓ Set performance targets and monitor progress toward meeting them
- ✓ Assess compliance at all sites and at the company level
- ✓ Identify risks and mitigate them
- ✓ Gain a thorough, in-depth view of performance
- ✓ Benefit from more reliable, auditable, and readily available QEHS data

Enablon, a Comprehensive Offering for QEHS Management

Enablon offers the industry's most comprehensive software suite for Quality, Environment, Health & Safety performance management.

Global companies are using Enablon solutions worldwide to improve the reporting and management of their environmental performance, better manage their risks, reduce costs and streamline business processes.

Enablon solutions help companies meet their QEHS management and compliance challenges: from environmental reporting and management of Air, Water, Waste and Chemicals, to Worker Safety and Incident Loss Prevention, and much more.

Enablon QEHS Software Suite

A comprehensive and integrated offering to improve your QEHS Performance

Enablon SD-QEHS Quality, Environment, Health & Safety

QEHS Management and Reporting

Enablon SD-QEHS is a comprehensive and integrated solution for Quality, Environment, Health and Safety management.

Functionalities & Benefits

- ✓ Automated reporting and management of QEHS data: consumption (raw materials, energy, water), air emission monitoring, waste management, environmental, health and safety management, etc.
- ✓ Compliance management: regulations, permit management, inspections and complaints
- ✓ Production of QEHS reports (sites, subsidiaries, group)
- ✓ QEHS information sharing (document library)
- ✓ Continuous monitoring of QEHS performance and compliance: dashboards, entity benchmarking, objectives management, automated alerts

Enablon IMS Incident Management System

Incident Management & Risk Prevention

Enablon IMS is an incident and event management solution, which enables companies to minimize risk while strengthening their risk management programs.

Functionalities & Benefits

- ✓ Identification and notification of incidents, near misses and non-conformities
- ✓ Analysis of human, economic, environmental causes and impacts
- ✓ Corrective and preventive action plan management
- ✓ Automated generation of regulatory forms and documents (OSHA 301, Riddor...)
- ✓ Obtention and monitoring of OHSAS 18001 certifications
- ✓ Automated calculation of incident frequency rates, risk mapping and dashboards

Enablon RCM Regulatory Compliance Management

EHS Regulatory Compliance & Assurance

Enablon RCM is a regulatory compliance management solution. It enables companies to maintain compliance with regulatory requirements, identify required permits and responsibilities and share environmental remediation best practices.

Functionalities & Benefits

- ✓ Legal Register shared throughout the company
- ✓ Local management of applicable regulations
- ✓ Permits & obligations management
- ✓ Monitoring of non-conformities
- ✓ Implementation and follow-up of action plans
- ✓ Planning of remediation actions

Enablon ACS Audit & Compliance System

Audit and Compliance System

Enablon ACS is a compliance management solution for companies and their suppliers. With its audit and compliance self assessment functionalities, the solution helps companies obtain and maintain ISO type certifications.

Functionalities & Benefits

- ✓ Checklist creation and audit protocols from normative (ISO, OHSAS, MASE, ILO...), regulatory (social, environmental, national and local regulations), and customized (codes of conduct) standards
- ✓ Schedule and launch internal and supplier audits and self-assessments
- ✓ Non-conformities and recommendations reporting
- ✓ Compliance analysis and dashboards
- ✓ Preventive and corrective action plan management

“ Enablon allows us to be highly flexible and responsive regarding actions to be undertaken. If I see a problem in a particular entity, I can immediately implement corrective actions throughout the world. ”

Gilles Veber, Director of Personnel, Property and Environmental Safety
THALES

Enablon CMS Chemical Management System

Chemical Substances Management

Enablon CMS is a chemical substances management solution which allows companies to implement, share and monitor a reliable chemical substances reporting management process to promote regulatory compliance (REACH, RoHS, etc.).

Functionalities & Benefits

- ✓ Management and sharing of Material Safety Data Sheet in CLP/GHS format
- ✓ Chemical substances inventory and use case compliance
- ✓ Identification and reduction of hazardous products (CMR, PBT, vPvB)
- ✓ Management of international regulations on forbidden or restricted of use substances (REACH, SVHC, ...)
- ✓ REACH compliance assessment according to supplier, use, tonnage, consortiums management, etc.
- ✓ Registration and authorization process management
- ✓ Automated generation of reports on storage, use and emissions of substances
- ✓ Compliance costs analysis

Enablon PCS Product Compliance and Stewardship

Product EHS Regulatory Compliance

Enablon PCS is a software solution designed to help companies monitor the environmental impact of their products and ensure their EHS regulatory compliance.

Functionalities & Benefits

- ✓ Updated regulatory compliance information database (RoHS, REACH, GHG, HCS, TSCA, WEE/Battery recycling, Packaging)
- ✓ Identification of substances and materials involved in manufactured products or processes
- ✓ Product assessment against compliance requirements
- ✓ Assessment of environmental impacts and characteristics
- ✓ Automated generation of compliance reports tailored to each specific regulation
- ✓ Assessment of suppliers' products based on compliance checklists

Enablon's Offering

Enabling the Sustainable Company

Enablon offers integrated software solutions and on-demand services to address:

- Corporate Responsibility
- Sustainable Supply Chain
- Energy and Carbon Management
- QEHS Performance Management
- Governance, Risk and Compliance

Accredited and Certified Software Solutions

Enablon solutions are accredited and certified by the Carbon Disclosure Project and the Global Reporting Initiative.

The Enablon Difference

- **The most comprehensive software offering** for Corporate Responsibility management
- **User-friendly solutions used** by more than 1 million users in 160 countries
- **Full-web & secure architecture** accessible anywhere, anytime
- **Patented flexible technology** which can be tailored to each company's processes and organization
- **Global network of partners** to provide a deep integration of expertise in consulting, services, content and technology

“ We were looking for a system that tied everything together in real time – sustainability reporting, energy consumption, EHS incident reporting and tracking, and corrective action tracking. The new solution integrates our reporting into a single, comprehensive, real-time system that we need in a global enterprise. ”

Kathy K. Williams, Corporate Safety Specialist
